

# **INTECH EUROZONE LOW VOLATILITY (EUR)**

**PRODUCT SUMMARY** 

As of September 30, 2016

# PRODUCT OVERVIEW AND INVESTMENT PHILOSOPHY

Strategy	Eurozone Equity Low Volatility
Benchmark	MSCI EMU Index (EUR)
Composite Inception Date	8/1/2012
Expected Risk Reduction*	Up to 60% less than the index
Expected Annual Turnover	75%-130%
<b>Strategy AUM</b> (as of 9/30/2016)	€6.9 Million

## PRODUCT OBJECTIVE

Benchmark-like returns, over the full market cycle, with a total volatility (standard deviation) considerably below that of the index.

### **INTECH'S INVESTMENT PHILOSOPHY**

- The capitalization-weighted index is not efficient and can be improved upon by varying portfolio weights based on the volatilities and correlations of stocks.
- Positive excess returns can be achieved over the long term using only estimates of volatilities and correlations, through systematic rebalancing.
- The opportunity for positive excess returns through rebalancing is demonstrated by Stochastic Portfolio Theory and further illustrated by the historical stability of the market's capital distribution.

\* Annualized long term, gross of fees. The expected risk reduction is based on mathematical projections that are reflective of what the strategy attempts to achieve during the optimization process. Actual results may vary, and the expected risk reduction should not be considered or relied upon as a performance guarantee. The expected risk reduction includes an effort to monitor and manage risk compared to the benchmark index, which should not be confused with and does not imply low investment risk or the ability to control risk.

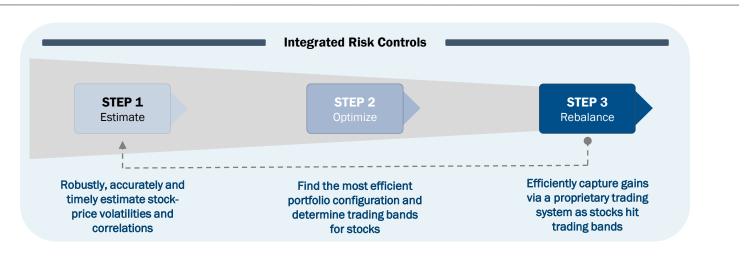

Strategy AUM may include custom solutions accounts that are based on the product, which may have different benchmarks than shown.

# **COMPOSITE PERFORMANCE**

			Annualized				Annualized (ITD)		
	QTD	1 Year	3 Years	5 Years	10 Years	ITD (8/1/12)	Std. Dev.	Vol. Red.	Sharpe Ratio
Gross of Fees (EUR)	2.86%	0.69%	7.06%			9.15%	10.16%	25%	0.67
Net of Fees (EUR)	2.77%	0.34%	6.69%			8.77%			
MSCI EMU Index (EUR)	6.61%	3.72%	6.82%			11.75%	13.60%	N/A	0.69
Difference (Gross-Index)	-3.75%	-3.03%	0.25%			-2.60%			

Periods of less than one year are not annualized. Data presented reflects past performance, which is no guarantee of future results. Performance includes the reinvestment of dividends and other earnings. Differences may not agree with input data due to rounding. See Presentation Notes for additional information.

## **INVESTMENT PROCESS**

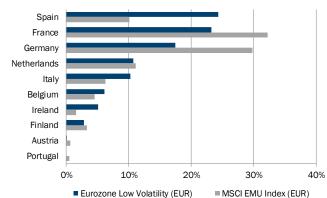

INTECH's process has been successfully implemented and refined for over 25 years.

#### PORTFOLIO CHARACTERISTICS (as of 9/30/2016)

## **PRESENTATION NOTES**

INTECH, an indirect subsidiary of Janus Capital Group Inc., is an investment adviser registered under the Investment Advisers Act of 1940 utilizing a mathematically-based, risk managed investment process that attempts to capitalize on volatility in stock price movements. INTECH is affiliated with Janus Capital Group Inc. and its subsidiaries and affiliates. These subsidiaries and/or affiliates include Janus Capital Management LLC and Perkins Investment Management LLC. Past performance cannot guarantee future results. Investing involves risk, including the possible loss of principal and fluctuation of value. In addition, the proprietary mathematical investment process used by INTECH may not achieve the desired results. Performance results reflect the reinvestment of dividends and other earnings. Portfolio performance results shown are time-weighted rates of return using daily valuation, include the effect of transaction costs (commissions, exchange fees, etc.), and are gross of non-reclaimable withholding taxes, if any. The composite includes all actual fee-paying accounts managed on a fully discretionary basis according to the investment strategy from inception date, including those no longer under management. Accounts meeting such criteria enter the composite upon the full first month under management. For periods of less than one year, performance is not annualized. Reporting currency is USD unless otherwise noted. INTECH claims compliance with the Global Investment of Jorden to the GIPS standards, glease contact INTECH at Finance@intechianus.com.

The gross performance results presented do not reflect the deduction of investment advisory fees. Returns will be reduced by such advisory fees and other contractual expenses as described in each client's individual contract.

The net performance results presented reflect the deduction of model investment advisory fees, and not the advisory fees actually charged to the accounts in the composite. Prior to December 31, 2004, the model advisory fees deducted reflect the maximum fixed fee in effect for each strategy. Beginning January 1, 2005, the model advisory fees deducted reflect the standard fee schedule in effect during the period shown, applied to each account in the composite on a monthly basis. Standard fee schedules are available upon request. Actual advisory fees paid may vary among clients invested in the same strategy, which may be higher or lower than the model advisory fees. Some accounts may utilize a performance-based fee.

Eurozone Low Volatility (EUR) Composite includes all fully discretionary separately managed portfolios invested in this strategy. The strategy pursues a risk-managed approach to construct a diversified portfolio of European large capitalization securities. The benchmark is the MSCI EMU Index. The objective is market-like returns as compared to the benchmark over the full market cycle, with a total volatility (standard deviation) considerably below that of the benchmark. The composite was created in August 2012.

The MSCI EMU (European Economic and Monetary Union) Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of countries within EMU

Investments are subject to certain risks, including currency fluctuations and changes in political and economic conditions, which could result in significant market fluctuations. These risks are magnified for portfolios that include emerging markets.

Prices assigned to investments are published prices on their primary markets or exchanges. Non U.S. securities are translated into U.S. dollars using the 4:00 P.M. London spot rate. However, if a significant event takes place between the close of the local market and the close of the U.S. domestic market, a security may be fair valued.

The Index returns are provided to represent the investment environment existing during the time periods shown and are not covered by the report of independent verifiers. For comparison purposes, the index is fully invested, which includes the reinvestment of dividends and capital gains. The returns for the index do not include any transactions costs, management fees or other costs, and are gross of dividend tax withholdings unless otherwise noted. Composition of each separately managed account portfolio may differ from securities in the corresponding benchmark index. The index is used as a performance benchmark only, as INTECH does not attempt to replicate an index. The weightings of securities within the portfolio may differ significantly from the weighting within the index. The index is not available for direct investment; therefore, its performance does not reflect the expenses associated with the active management of an actual portfolio.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein, if shown. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report has not been approved, reviewed, or produced by MSCI.
