

INTECH U.S. LOW VOLATILITY

PRODUCT SUMMARY

As of June 30, 2017

PRODUCT OVERVIEW AND INVESTMENT PHILOSOPHY

Strategy	U.S. Equity Low Volatility
Benchmark	Russell 1000 Index
Composite Inception Date	8/1/2012
Expected Risk Reduction*	Up to 45% less than the index
Expected Annual Turnover	25-65%
Strategy AUM (as of 6/30/2017)	\$1.4B

PRODUCT OBJECTIVE

Benchmark-like returns, over the full market cycle, with a total volatility (standard deviation) considerably below that of the index.

INTECH'S INVESTMENT PHILOSOPHY

- The capitalization-weighted index is not efficient and can be improved upon by varying portfolio weights based on the volatilities and correlations of stocks.
- Positive excess returns can be achieved over the long term using only estimates of volatilities and correlations, through systematic rebalancing.
- The opportunity for positive excess returns through rebalancing is demonstrated by Stochastic Portfolio Theory and further illustrated by the historical stability of the market's capital distribution.

* Annualized long term, gross of fees. The expected risk reduction is based on mathematical projections that are reflective of what the strategy attempts to achieve during the optimization process. Actual results may vary, and the expected risk reduction should not be considered or relied upon as a performance guarantee. The expected risk reduction includes an effort to monitor and manage risk compared to the benchmark index, which should not be confused with and does not imply low investment risk or the ability to control risk.

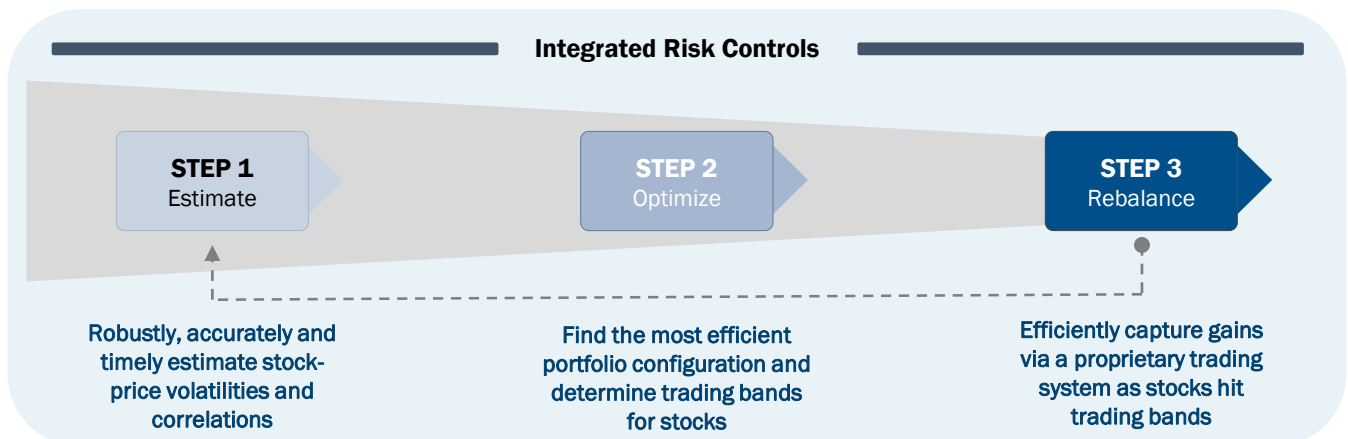

Strategy AUM may include custom solutions accounts that are based on the product, which may have different benchmarks than shown.

COMPOSITE PERFORMANCE

	Annualized						Annualized (ITD)		
	QTD	1 Year	3 Years	5 Years	10 Years	ITD (8/1/12)	Std. Dev.	Vol. Red.	Sharpe Ratio
Gross of Fees	2.67%	7.86%	11.20%	—	—	14.06%	8.35%	14.22%	1.67
Net of Fees	2.59%	7.51%	10.84%	—	—	13.69%	—	—	—
Russell 1000 Index	3.06%	18.03%	9.26%	—	—	14.66%	9.73%	N/A	1.49
Difference (Gross-Index)	-0.39%	-10.17%	1.94%	—	—	-0.60%			

Periods of less than one year are not annualized. Data presented reflects past performance, which is no guarantee of future results. Performance includes the reinvestment of dividends and other earnings. Differences may not agree with input data due to rounding. See Presentation Notes for additional information.

INVESTMENT PROCESS

INTECH's process has been successfully implemented and refined for over 30 years.

PORTFOLIO CHARACTERISTICS (as of 6/30/2017)

PRESENTATION NOTES

INTECH Investment Management LLC ("INTECH") is a specialized global asset manager registered under the Investment Advisers Act of 1940 that applies advanced mathematics and systematic portfolio rebalancing to exploit a unique and reliable source of excess returns and risk control – stock price volatility. INTECH is a subsidiary of Janus Henderson Group plc (NYSE: JHG) and is affiliated with its subsidiaries and affiliates. **Past performance cannot guarantee future results. Investing involves risk, including the possible loss of principal and fluctuation of value.** In addition, the proprietary mathematical investment process used by INTECH may not achieve the desired results. Performance results reflect the reinvestment of dividends and other earnings. Portfolio performance results shown are time-weighted rates of return using daily valuation, include the effect of transaction costs (commissions, exchange fees, etc.), and are gross of non-reclaimable withholding taxes, if any. The composite includes all actual fee-paying accounts managed on a fully discretionary basis according to the investment strategy from inception date, including those no longer under management. Accounts meeting such criteria enter the composite upon the full first month under management. For periods of less than one year, performance is not annualized. Reporting currency is USD unless otherwise noted. INTECH claims compliance with the Global Investment Performance Standards (GIPS®). To receive a complete list of composite descriptions and/or presentations that adhere to the GIPS standards, please contact INTECH at Finance@intechinvestments.com.

The gross performance results presented do not reflect the deduction of investment advisory fees. Returns will be reduced by such advisory fees and other contractual expenses as described in each client's individual contract.

The net performance results presented reflect the deduction of model investment advisory fees, and not the advisory fees actually charged to the accounts in the composite. Prior to December 31, 2004, the model advisory fees deducted reflect the maximum fixed fee in effect for each strategy. Beginning January 1, 2005, the model advisory fees deducted reflect the standard fee schedule in effect during the period shown, applied to each account in the composite on a monthly basis. Standard fee schedules are available upon request. Actual advisory fees paid may vary among clients invested in the same strategy, which may be higher or lower than the model advisory fees. Some accounts may utilize a performance-based fee.

U.S. Low Volatility Composite includes all fully discretionary separately managed portfolios invested in this strategy. The strategy pursues a risk-managed approach to construct a diversified portfolio of U.S. large capitalization securities. The benchmark is the Russell 1000 Index. The objective is market-like returns as compared to the benchmark over the full market cycle, with a total volatility (standard deviation) considerably below that of the benchmark. The composite was created in August 2012.

The Russell 1000 Index measures performance of the 1,000 largest companies in the Russell 3000 Index.

The Index returns are provided to represent the investment environment existing during the time periods shown and are not covered by the report of independent verifiers. For comparison purposes, the index is fully invested, which includes the reinvestment of dividends and capital gains. The returns for the index do not include any transactions costs, management fees or other costs, and are gross of dividend tax withholdings unless otherwise noted. Composition of each separately managed account portfolio may differ from securities in the corresponding benchmark index. The index is used as a performance benchmark only, as INTECH does not attempt to replicate an index. The weightings of securities within the portfolio may differ significantly from the weighting within the index. The index is not available for direct investment; therefore, its performance does not reflect the expenses associated with the active management of an actual portfolio.

Investments are subject to certain risks, including currency fluctuations and changes in political and economic conditions, which could result in significant market fluctuations. These risks are magnified for portfolios that include emerging markets.
