Class I	1.60	1.40
Class S	2.09	1.84
Class T	1.79	1.59

Net expense ratios reflect the expense waiver, if any, contractually agreed to through 2/1/18.

Fund Description

All-cap, emerging markets equity fund seeks excess returns on a sustainable basis and in a risk-aware framework. Emerging markets are often characterized by secular economic growth, high volatility and pronounced earnings cycles. We believe our quality Growth At A Reasonable Price (GARP) approach is well suited to this asset class as we seek to invest in companies with earnings growth potential and valuations not fully recognized by the market.

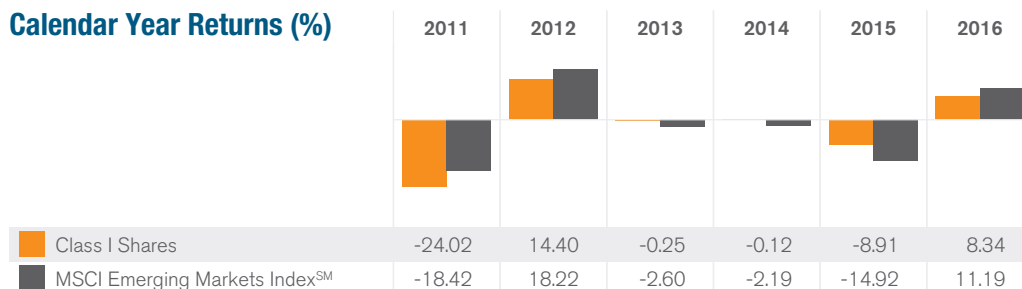

Fund Performance (%)

	1Q17	1 yr	3 yr	5 yr	10 yr	Since Inception (12/28/10)
Class I Shares	12.41	19.69	3.56	1.73	—	-0.50
Class T Shares	12.31	19.47	3.29	1.46	—	-0.69
Class A Shares @ NAV	12.25	19.20	3.09	1.27	—	-0.85
Class A Shares @ MOP	5.77	12.38	1.08	0.08	—	-1.79
MSCI Emerging Markets Index SM	11.45	17.22	1.18	0.81	—	-0.15

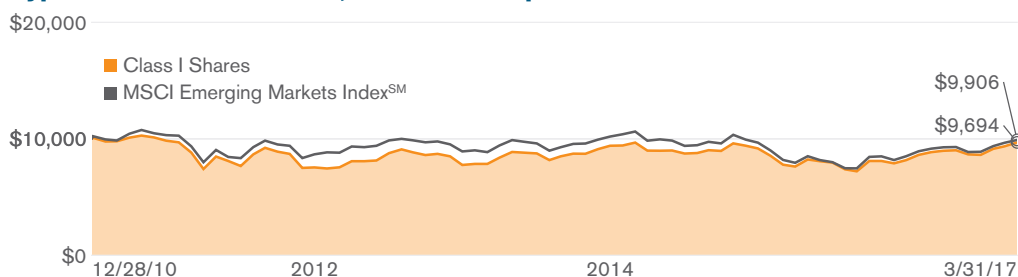

Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 877.33JANUS (52687) or visit janus.com/advisor/mutual-funds.

Maximum Offering Price (MOP) returns include the maximum sales charge of 5.75%. Net Asset Value (NAV) returns exclude this charge, which would have reduced returns.

Calendar Year Returns (%)

Hypothetical Growth of \$10,000 Since Inception

Subject to shareholder approval, the Fund is expected to merge into a similar fund. See the prospectus for further details.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

This Fund has a performance-based management fee that may adjust up or down based on the Fund's performance.

Not all Funds and Share classes may be available. Please consult your financial advisor.

Index represents the MSCI Emerging Markets IndexSM. Holdings are subject to change without notice. For a complete list of holdings as of the most recent publicly available disclosure period, visit janus.com/advisor/mutual-funds.

Equity country, regional, sector and industry weights based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights based on Barclays classifications.

Swaps, if any, are reported based on notional exposure.

Performance may be affected by risks that include those associated with non-diversification, portfolio turnover, short sales, potential conflicts of interest, foreign and emerging markets, initial public offerings (IPOs), high-yield and high-risk securities, undervalued, overlooked and smaller capitalization companies, real estate related securities including Real Estate Investment Trusts (REITs), derivatives, and commodity-linked investments. Each product has different risks. Please see the prospectus for more information about risks, holdings and other details.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets. Derivatives can be highly volatile and more sensitive to changes in economic or market conditions than other investments. This could result in losses that exceed the original investment and may be magnified by leverage.

There are special risks associated with selling securities short. Stocks sold short have the potential risk of unlimited losses.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

MSCI Emerging Markets IndexSM reflects the equity market performance of emerging markets. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility. **R-Squared (R²)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R² indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk.

Please consider the charges, risks, expenses and investment objectives carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, please call Janus at 877.33JANUS (52687) or download the file from janus.com/info. Read it carefully before you invest or send money.
