Assets	\$109.11 M
Number of Holdings	
Equity Issues	59
Turnover (1 year trailing)	49.26%
Weighted Average Market Cap	\$73.34 B
Distribution Frequency	Annually

Expense Ratios (%)

	Gross	Net
Class A	1.17	1.00
Class C	1.98	1.82
Class I	0.88	0.72
Class S	1.27	1.13
Class T	1.02	0.87

Net expense ratios reflect the expense waiver, if any, contractually agreed to through 11/1/17.

Fund Description

A defensive all-cap value fund that seeks to provide attractive returns over a full market cycle by mitigating losses in down markets while participating in up markets. The strategy has the flexibility to move between market caps based on the most attractive opportunities and, at times, may hold an increased position in cash.

Fund Performance (%)

	1Q17	1 yr	3 yr	5 yr	10 yr	Since Inception (12/15/11)
Class I Shares	3.61	21.30	8.95	10.67	—	12.75
Class T Shares	3.61	21.12	8.78	10.46	—	12.54
Class A Shares @ NAV	3.62	20.95	8.62	10.30	—	12.39
Class A Shares @ MOP	-2.33	14.04	6.51	9.00	—	11.14
Russell 3000® Value Index	2.99	19.97	8.58	13.08	—	15.46

Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 877.33JANUS (52687) or visit janus.com/advisor/mutual-funds.

Maximum Offering Price (MOP) returns include the maximum sales charge of 5.75%. Net Asset Value (NAV) returns exclude this charge, which would have reduced returns.

Calendar Year Returns (%)

Hypothetical Growth of \$10,000 Since Inception

Source: Morningstar, Inc.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

This Fund has a performance-based management fee that may adjust up or down based on the Fund's performance.

Not all Funds and Share classes may be available. Please consult your financial advisor.

Index represents the Russell 3000® Value Index.

Holdings are subject to change without notice. For a complete list of holdings as of the most recent publicly available disclosure period, visit janus.com/advisor/mutual-funds.

Equity country, regional, sector and industry weights based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights based on Barclays classifications.

Performance may be affected by risks that include those associated with non-diversification, portfolio turnover, short sales, potential conflicts of interest, foreign and emerging markets, initial public offerings (IPOs), high-yield and high-risk securities, undervalued, overlooked and smaller capitalization companies, real estate related securities including Real Estate Investment Trusts (REITs), derivatives, and commodity-linked investments. Each product has different risks. Please see the prospectus for more information about risks, holdings and other details.

Holding a meaningful portion of assets in cash or cash equivalents may negatively affect performance.

Real estate securities, including Real Estate Investment Trusts (REITs) may be subject to additional risks, including interest rate, management, tax, economic, environmental and concentration risks.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged and not available for direct investment.

Russell 3000® Value Index measures the performance of the broad value segment of the U.S. equity universe. It includes those Russell 3000 companies with lower price-to-book ratios and lower forecasted growth values. **Alpha** compares risk-adjusted performance relative to an index. Positive alpha means outperformance on a risk-adjusted basis. **Beta** measures the volatility of a security or portfolio relative to an index. Less than one means lower volatility than the index; more than one means greater volatility. **R-Squared (R²)** measures the relationship between portfolio and index performance on a scale of 0.00 (0%) to 1.00 (100%). A higher R² indicates more of the portfolio's performance is affected by market movements and vice versa. **Standard Deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance using excess returns versus the "risk-free" rate and the volatility of those returns. A higher ratio means better return per unit of risk.

Please consider the charges, risks, expenses and investment objectives carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, please call Janus at 877.33JANUS (52687) or download the file from janus.com/info. Read it carefully before you invest or send money.
