Fund Characteristics

Inception Date	11/28/06
Assets	\$167.25 M
Number of Holdings	
Equity Issues	61
Turnover (1 year trailing)	46.67%
Weighted Average Market Cap	\$56.05 B
Distribution Frequency	Annually

Expense Ratios (%)

	Gross	Net
Class A	1.05	1.05
Class C	1.84	1.84
Class I	0.78	0.78
Class N	0.71	0.71
Class S	1.22	1.22
Class R	1.47	1.47
Class T	0.97	0.97

Net expense ratios reflect the expense waiver, if any, Janus Capital has contractually agreed to through 2/1/17.

Fund Description

This international approach seeks quality growth companies not fully appreciated by the market. The portfolio managers seek to deliver superior risk-adjusted returns with consistency for clients by focusing on stock selection and prudent management of portfolio-level risks.

Fund Performance (%)

	4Q16	1 yr	3 yr	5 yr	10 yr	Since Inception (11/28/06)
Class A Shares @ NAV	-3.31	-4.80	-4.62	4.61	2.05	2.56
Class A Shares @ MOP	-8.87	-10.28	-6.48	3.38	1.45	1.96
Class I Shares	-3.19	-4.45	-4.32	4.94	2.34	2.85
Class T Shares	-3.23	-4.66	-4.49	4.75	2.16	2.66
MSCI EAFE® Index	-0.71	1.00	-1.60	6.53	0.75	1.25
MSCI All Country World ex-U.S. Index SM	-1.25	4.50	-1.78	5.00	0.96	1.46

Returns quoted are past performance and do not guarantee future results; current performance may be lower or higher. Investment returns and principal value will vary; there may be a gain or loss when shares are sold. For the most recent month-end performance call 877.33JANUS (52687) or visit janus.com/advisor/mutual-funds.

Maximum Offering Price (MOP) returns include the maximum sales charge of 5.75%. Net Asset Value (NAV) returns exclude this charge, which would have reduced returns.

Calendar Year Returns (%)

	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Class I Shares	22.23	-45.99	52.08	14.30	-13.67	18.94	22.16	-5.16	-3.33	-4.45
MSCI EAFE® Index	11.17	-43.38	31.78	7.75	-12.14	17.32	22.78	-4.90	-0.81	1.00

Hypothetical Growth of \$10,000 Since Inception

Based on the Fund's "parent" share class (typically that with the longest history). Performance varies by share class.

Performance for Class A Shares, Class I Shares and Class T Shares prior to 7/6/09 reflects the performance of one or more similar share classes of the Fund or a predecessor fund, adjusted, where applicable and permitted, for differing fees and expenses. See the Fund's prospectus for further details concerning historical performance.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

This Fund has a performance-based management fee that may adjust up or down based on the Fund's performance.

Not all Funds and Share classes may be available. Please consult your financial advisor.

Index represents the MSCI EAFE® Index.

Holdings are subject to change without notice. For a complete list of holdings as of the most recent publicly available disclosure period, visit janus.com/advisor/mutual-funds.

Equity country, regional, sector and industry weights based on MSCI and GICS classifications. Fixed income country, regional, sector and industry weights based on Barclays classifications.

A Fund's performance may be affected by risks that include those associated with nondiversification, non-investment grade debt securities, high-yield/high-risk securities, undervalued or overlooked companies, investments in specific industries or countries and potential conflicts of interest. Additional risks to a Fund may also include, but are not limited to, those associated with investing in foreign securities, emerging markets, initial public offerings, real estate investment trusts (REITs), derivatives, short sales, commodity-linked investments and companies with relatively small market capitalizations. Each Fund has different risks. Please see a Janus prospectus for more information about risks, Fund holdings and other details.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

A Fund's portfolio may differ significantly from the securities held in an index. An index is unmanaged and not available for direct investment; therefore its performance does not reflect the expenses associated with the active management of an actual portfolio.

MSCI EAFE® (Europe, Australasia, Far East) Index is a free float-adjusted market capitalization weighted index designed to measure developed market equity performance. The MSCI EAFE® Index is composed of companies representative of the market structure of developed market countries. The index includes reinvestment of dividends, net of foreign withholding taxes. **MSCI All Country World ex-U.S. Index™** is an unmanaged, free float-adjusted, market capitalization weighted index composed of stocks of companies located in countries throughout the world, excluding the United States. It is designed to measure equity market performance in global developed and emerging markets outside the United States. The index includes reinvestment of dividends, net of foreign withholding taxes. **Alpha** compares the risk-adjusted performance of a portfolio to a benchmark index. A positive alpha means the portfolio has outperformed the index on a risk-adjusted basis. **Beta** is a measure of the volatility of a portfolio in comparison to a benchmark index. Less than one means the portfolio is less volatile than the index, while greater than one indicates more volatility than the index. **R-Squared (R²)** represents the percentage of the portfolio's performance that can be explained by the general movements of a benchmark index. An R² of 1.00 indicates perfect correlation to the index and an R² of 0.00 indicates no correlation. The lower the R², the more the portfolio's performance is affected by factors other than the market as measured by that benchmark index. **Standard deviation** measures historical volatility. Higher standard deviation implies greater volatility. **Sharpe Ratio** measures risk-adjusted performance by dividing the portfolio's excess returns (returns above a "risk-free" rate such as a Treasury bill) by the standard deviation of those returns. The higher the ratio, the better the portfolio's return per unit of risk.

Please consider the charges, risks, expenses and investment objectives carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, please call Janus at 877.33JANUS (52687) or download the file from janus.com/info. Read it carefully before you invest or send money.
