

GIPS List of Composite Descriptions

Updated 5/12/14

Concentrated Growth Composite-330

Concentrated Growth portfolios, benchmarked to the Russell 1000 Growth Index, take concentrated positions in larger well-established companies along with smaller, more aggressive positions selected for their growth potential. A typical portfolio concentrates its investments in 20 to 40 equity securities. Effective January 1, 2005 the composite definition was changed to include subadvised pooled funds as well as separately managed institutional accounts. Effective January 1, 2009 the composite definition was expanded to also include proprietary mutual funds. Prior to 2006 the composite was known as the Concentrated Aggressive Growth composite. A minimum asset size requirement of \$5 million for composite participation was used prior to January 1, 2006. The composite was created in January 2005.

Classic Growth Composite-465

Classic Growth portfolios, benchmarked to the Russell 1000 Growth Index, invest in a diversified portfolio of common stocks selected for their growth potential. Although the portfolios can invest in companies of any size, they generally emphasize positions in larger, well-established companies. A typical portfolio invests in 70 to 90 equity securities. The composite was created in October 2008 and may include proprietary mutual funds, subadvised pooled funds, and separately managed institutional accounts.

Opportunistic Growth Composite-84

Opportunistic Growth portfolios, benchmarked to the Russell 1000 Growth Index, pursue strong growth opportunities in companies of any size, wherever they may exist. Under normal market conditions, the portfolios hold less than 80 equity securities. Effective January 1, 2005 the composite definition was changed to include sub-advised pooled funds as well as separately managed institutional accounts. A minimum asset size requirement of \$1 million for composite participation was used prior to January 1, 2006. The composite was created in January 1995.

Focused Equity Composite-419

Focused Equity portfolios, benchmarked to the Russell 1000 Growth Index, take concentrated positions in primarily US larger, well-established companies selected for their growth potential. Portfolio may at times hold large percentages in higher conviction stocks. A typical portfolio holds 20 to 40 equity securities. The composite was created in July 2013.

Large Cap Growth Composite-82

Large Cap Growth portfolios, benchmarked to the Russell 1000 Growth Index, take concentrated positions in larger, well-established companies. The portfolios may have exposure to foreign securities when our research uncovers international companies with sound fundamentals and compelling earnings growth potential. A typical portfolio holds 35 to 55 growth equity securities. Effective January 1, 2005 the composite definition was changed to include subadvised pooled funds as well as separately managed institutional accounts. A minimum asset size requirement of \$5 million for composite participation was used prior to January 1, 2006. The composite was created in January 1995.

Mid Cap Growth Composite-83

Mid Cap Growth portfolios, benchmarked to the Russell Midcap Growth Index, invest in a diversified group of stocks with market capitalizations from \$2 billion to \$13 billion at the time of purchase. The portfolio stock selection process emphasizes predictability and sustainability of growth. Effective January 1, 2005 the composite definition was changed to include sub-advised pooled funds as well as separately managed institutional accounts. Effective January 1, 2009 the composite definition was expanded to also include proprietary mutual funds. A minimum asset size requirement of \$5 million for composite participation was used prior to January 1, 2006. The composite was created in January 1995.

Small-Mid Cap Growth Composite-863

Small-Mid Cap Growth portfolios, benchmarked to the Russell 2500 Growth Index and secondarily to the Russell 2000 Growth Index, invest primarily in small-sized and medium-sized companies selected for their growth potential. Small- and medium-sized companies have market capitalizations less than \$10 billion. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. The composite was created in March 2005.

Small Company Growth Composite-488

Small Company Growth portfolios, benchmarked to the Russell 2000 Growth Index, invest primarily in small-sized companies selected for their growth potential. Small sized companies are generally those who have market capitalizations less the \$4 billion. A typical portfolio invests in 90 to 140 equity securities. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. Effective January 1, 2009 the composite definition was expanded to also include sub-advised pooled funds and separately managed institutional accounts. The composite was created in January 2003.

US Research Growth Equity Composite-411

US Research Growth Equity portfolios, benchmarked to the Russell 1000 Growth Index, invest in high conviction investment ideas selected by the Janus research team, based on rigorous fundamental research. The portfolios generally contain 90-120 large and mid size companies and maintain portfolio sector weightings, based upon how Janus aligns sector research teams, that closely follow the Russell 1000 Growth Index. The composite was created in August 2007.

US Research Concentrated Growth Equity Composite-412

*Balanced Index is a monthly rebalanced blend of 55% S&P500 and 45% Barclays US Government/Credit Indices.

International Equity-retail Composite

International Equity-retail portfolios, benchmarked to the MSCI EAFE Index, concentrate on finding growth companies located outside of the United States. The portfolios, under normal circumstances, will invest substantially all of their assets in issuers located outside the United States. The portfolios may have exposure to emerging markets, but will normally limit such investment to 15% of net assets. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. The composite was created in December 2006. Composite was terminated in 2009.

Mid Cap Value-retail Composite

Mid Cap Value-retail portfolios, benchmarked to the Russell MidCap Value Index, invest primarily in domestic companies whose market capitalization, at time of initial purchase, is within a range of \$1 billion to the 12-month average of the maximum market capitalization for companies included in the Russell Mid Cap Index. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. The composite was created in January 2003. Composite was terminated in 2009.

Small Cap Value-retail Composite

Small Cap Value-retail portfolios, benchmarked to the Russell 2000 Value Index, invest primarily in domestic companies whose market capitalization, at time of initial purchase, is less than the 12-month average of the maximum market capitalization for companies included in the Russell 2000 Index. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. The composite was created in January 2003. Composite was terminated in 2009.

Floating Rate High Income-retail Composite

Floating Rate High Income-retail portfolios, benchmarked to the CSFB Leveraged Loan Index, seek a high level of current by investing in floating or adjustable loans and other adjustable rate securities. The fund's investments in adjustable rate securities are generally rated below investment grade or are unrated. The composite was created in June 2007 and was terminated in February 2009.

Broad Large Cap Growth-retail Composite

Broad Large Cap Growth-retail portfolios invest in a diversified portfolio of common stocks selected for their growth potential. Although the portfolios can invest in companies of any size, they generally emphasize positions in larger, well-established is companies. Generally, a typical portfolio invests in 80 to 120 equity securities. Effective January 1, 2005 the composite definition was changed to include only proprietary mutual funds and exclude sub-advised pooled funds. Prior to 2005 the composite was known as the AllCap Growth composite. The Composite was terminated in 2008.

Fundamental Equity-retail Composite

Fundamental Equity-retail portfolios takes positions in companies of any size with emphasis placed on larger, more established companies. Under normal circumstances the portfolios invest at least 80% in equity securities and will also invest in other securities with equity characteristics.
