Dynamic Beta for Managing Equity Volatility

Global equity exposure is key to an investor's portfolio, but amidst the uncertainty of today's markets should be paired with a strategy designed to lessen losses. **INTECH Global Income Managed Volatility Fund** is a long-only, global developed-markets equity fund that seeks smaller drawdowns and a smoother ride over time by balancing downside mitigation with upside participation for any market environment. The Fund employs a systematic "dynamic beta" investment approach designed to adjust to changing risk environments, seeking up to 45% less volatility versus the MSCI World High Dividend Yield Index.

Why Invest in the Fund

Dynamic Beta Positioning

As risk in the market increases, the portfolio shifts to take a more defensive posture, targeting a lower beta than the index. When risk levels decrease, the portfolio migrates to a more market-like stance, targeting a higher beta, allowing for the full potential to benefit from the upward trend in the market.

25+ Years of Volatility Research

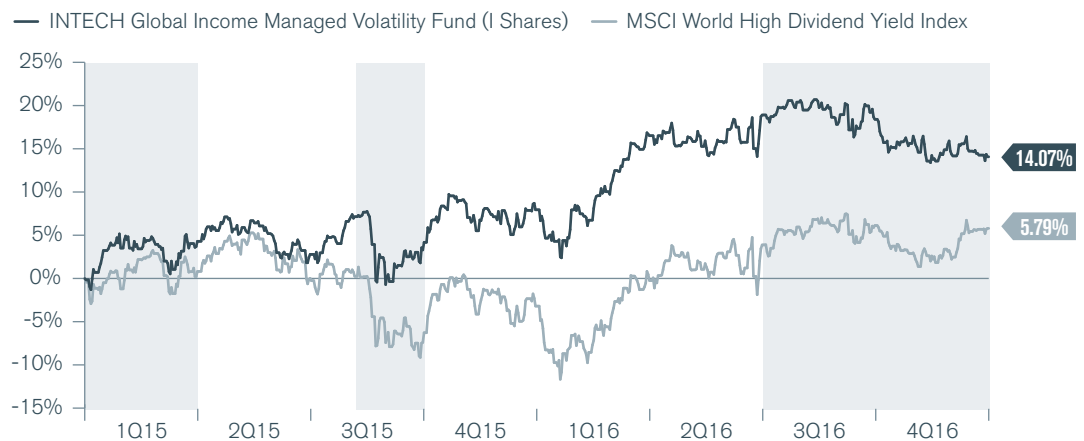

INTECH's dedicated volatility management team, with over 25 years experience, is comprised of experts who have dedicated their life's work, academic research and careers to developing this disciplined, repeatable and unemotional process based on the sole input of volatility.

Focus on Risk-Adjusted Return + Monthly Income

Our process is designed to construct a portfolio of long-only stocks with the highest return potential and lowest risk. By seeking a smoother ride, the Fund may help investors maintain equity market exposure and have the opportunity to build more wealth over time. Additionally, it may serve as a complementary income source to traditional fixed income.

Navigating Many Different Market Environments

Fund and Benchmark Cumulative Returns (12/31/14 - 12/31/16)

Moderate Up Market Designed to Outperform

During the **first quarter's** moderate move higher, we saw the Fund outpace the market.

Down Market Designed to Outperform

Volatility heightened in **August and September**. The Fund experienced less downside and outperformed its index.

Sharp Risk-On Up Market Potential to Underperform

The Fund lagged the market during the **second half of 2016**, as the riskiest stocks were rewarded.

Read it carefully before you invest or send money.

Returns include reinvestment of dividends and capital gains. Returns greater than one year are annualized.

There is no assurance that the investment process will consistently lead to successful investing. There is no assurance the stated objectives(s) will be met. Mutual fund investing involves market risk. Investment return and fund share value will fluctuate and it is possible to lose money by investing.

Foreign securities are subject to additional risks including currency fluctuations, political and economic uncertainty, increased volatility, lower liquidity and differing financial and information reporting standards, all of which are magnified in emerging markets.

INTECH's focus on managed volatility may keep the Fund from achieving excess returns over its index. The strategy may underperform during certain periods of up markets, and may not achieve the desired level of protection in down markets.

The Morningstar percentile ranking is based on a fund's total return (including income and capital gains, if any, and excluding sales charges) relative to all funds in the same category for the period. The highest (or most favorable) percentile rank is 1%, and the lowest (or least favorable) percentile rank is 100%. The top-performing funds in a category will always receive a rank of 1.

When an expense waiver is in effect, it may have a material effect on the total return or yield, and therefore the ranking and/or rating for the period.

MSCI World IndexSM is a market capitalization weighted index composed of companies representative of the market structure of Developed Market countries in North America, Europe and the Asia/Pacific Region. The index includes reinvestment of dividends, net of foreign withholding taxes. **MSCI World High Dividend Yield Index** is designed to reflect the performance of the high dividend yield securities contained within the broader MSCI World Index. MSCI World High Dividend Yield Index includes large and mid cap stocks from developed markets across the Americas, Asia-Pacific and Europe. **Beta** is a measure of the volatility of a portfolio in comparison to a benchmark index. Less than one means the portfolio is less volatile than the index, while greater than one indicates more volatility than the index. A Fund's portfolio may differ significantly from the securities held in an index. An index is unmanaged and not available for direct investment; therefore its performance does not reflect the expenses associated with the active management of an actual portfolio.

Creating a truly global, client-focused investment management firm through a merger of equals

Janus Capital Group and Henderson Global Investors are expected to complete their announced “merger of equals” in the second quarter of 2017, subject to requisite approvals. In the meantime, here is a preview from the new firm.

The investment landscape and investors’ needs are changing daily, and as investment thought leaders, Janus and Henderson are continually adapting to meet those needs. We believe this merger will benefit our clients as it creates a truly global active management firm with \$320 billion in assets under management (as of 9/30/16). The new firm will offer a broader range of investment options and the combined resources of Henderson and Janus. From the market commentary and insights of *Knowledge. Shared.*, to the programs offered through *Janus Labs*, a wide range of innovative tools can help you deepen your expertise, build your practice and communicate with clients.

If the mergers are approved, products will be renamed during the second quarter of 2017 and Henderson mutual funds will be merged into the Janus Henderson fund family. We look forward to the opportunity to serve you as the combined Janus Henderson Investors.
